

What is claimed is:

1. Anti-personnel ammunition including
  - (a) a hollow casing having a base member at one end thereof and an adapter case at the other end thereof, said hollow casing being adapted to contain a solid propellant,
  - (b) an electric primer affixed to said base member by means of spring clips,
  - (c) a conical shaped capped Canister including a payload contained therein which mates with the adapter case and is held in place by a pair of objurators.
2. Ammunition in accordance with claim 1 wherein said Canister is aluminum.
3. Ammunition in accordance with claim 1 wherein said payload comprises a combination of tungsten balls and tungsten cubes.
4. Ammunition in accordance with claim 1 wherein the Canister is adapted with longitudinal grooves.
5. Ammunition in accordance with claim 1 wherein said payload comprises steel balls.
6. Ammunition in accordance with claim 1 wherein the payload comprises tungsten balls.
